NCAA Division I Team Selections to Championships
2016 Cross Country -- MEN'S MOCK SELECTIONS DETAIL

This report shows in mock detail the at-large team selection process. The first consideration selects 20 teams, plus ties, to advance to the national first round. The second consideration selects the next 15 teams, plus ties while the third consideration fills the remainder of the national first round field with up to five teams.

TEAM (RPI Rk) – Lists the team with its national RPI ranking.

W-L – Season win-loss record – The team's season win-loss record in eligible races

Conference (Pl) – Conference in which the team belonged and the team's placing in the conference championships

Region (Rk) – The team's region with the team's ranking within the region of national RPI.

vs Pool – Evaluation of the team's season results versus teams in the current selection pool.
W-L – Win-loss record in head-to-head results versus the pool.
WWI – Weighted winning index of the W-L record versus the pool. Winning records have a WWI that is equal to the formula 10(W-L)+W. WWI of losing teams (listed in red or purple for teams with zero wins) is listed as winning percentage.
Rk – Ranking of the team's WWI vs the pool among those in the selection pool. The best in the category is highlighted in dark blue. Marked in yellow are teams with a category ranking within the selection range (for reference only).

vs QTS – Evaluation of the team's season results versus quality teams selected (QTS) – QTS are those already selected into the championship field who have a national RPI in the top 75
W-L – Win-loss record in head-to-head results versus QTS
WWI – Weighted winning index of the W-L record versus QTS. Winning records have a WWI that is equal to the formula 10(W-L)+W. WWI of losing teams (listed in red or purple for teams with zero wins) is listed as winning percentage.
Rk – Ranking of the team's WWI vs QTS among those in the selection pool. Marked in yellow are teams with a category ranking within the selection range (for reference only).

vs Region Top 4s – Evaluation of the team's season results versus all teams ranked in any region's top 4 (RT4) and with a national RPI in the top 100.
W-L – Win-loss record in head-to-head results versus RT4
WWI – Weighted winning index of the W-L record versus RT4. Winning records have a WWI that is equal to the formula 10(W-L)+W. WWI of losing teams (listed in red or purple for teams with zero wins) is listed as winning percentage.
Rk – Ranking of the team's WWI vs RT4 among those in the selection pool. Marked in yellow are teams with a category ranking within the selection range (for reference only).

OVERALL – The overall tally of ranking points and final-rank order of the team within the selection pool. Ranking within the selection pool is based on the sum of rank-orders from each of the three evaluation categories. Teams with the lowest overall ranking points receive the highest final rankings.

(far right column) – If team not selected in consideration round, the final column lists which consideration (or round) the team subsequently is chosen, if they are.

This report shows in mock detail the at-large team selection process. The first consideration selects 20 teams, plus ties, to advance to the national first round. The second consideration selects the next 15 teams, plus ties while the third consideration fills the remainder of the national first round field with up to five teams.

TEAM (RPI Rk) – Lists the team with its national RPI ranking.

W-L – Season win-loss record – The team's season win-loss record in eligible races

Conference (Pl) – Conference in which the team belonged and the team's placing in the conference championships

Region (Rk) – The team's region with the team's ranking within the region of national RPI.

vs Pool – Evaluation of the team's season results versus teams in the current selection pool.
W-L – Win-loss record in head-to-head results versus the pool.
WWI – Weighted winning index of the W-L record versus the pool. Winning records have a WWI that is equal to the formula 10(W-L)+W. WWI of losing teams (listed in red or purple for teams with zero wins) is listed as winning percentage.
Rk – Ranking of the team's WWI vs the pool among those in the selection pool. The best in the category is highlighted in dark blue. Marked in yellow are teams with a category ranking within the selection range (for reference only).

vs QTS – Evaluation of the team's season results versus quality teams selected (QTS) – QTS are those already selected into the championship field who have a national RPI in the top 75
W-L – Win-loss record in head-to-head results versus QTS
WWI – Weighted winning index of the W-L record versus QTS. Winning records have a WWI that is equal to the formula 10(W-L)+W. WWI of losing teams (listed in red or purple for teams with zero wins) is listed as winning percentage.
Rk – Ranking of the team's WWI vs QTS among those in the selection pool. Marked in yellow are teams with a category ranking within the selection range (for reference only).

vs Region Top 4s– Evaluation of the team's season results versus all teams ranked in any region's top 4 (RT4) and with a national RPI in the top 100.
W-L – Win-loss record in head-to-head results versus RT4
WWI – Weighted winning index of the W-L record versus RT4. Winning records have a WWI that is equal to the formula 10(W-L)+W. WWI of losing teams (listed in red or purple for teams with zero wins) is listed as winning percentage.
Rk – Ranking of the team's WWI vs RT4 among those in the selection pool. Marked in yellow are teams with a category ranking within the selection range (for reference only).

OVERALL – The overall tally of ranking points and final-rank order of the team within the selection pool. Ranking within the selection pool is based on the sum of rank-orders from each of the three evaluation categories. Teams with the lowest overall ranking points receive the highest final rankings.

(far right column) – If team not selected in consideration round, the final column lists which consideration (or round) the team subsequently is chosen, if they are.
